

# Acquisition Reform Success Story

## Interim Vector Scorer

**System Program Director:** Lt Col Ken Hislop  
**Program Manager:** 1Lt Jim Reynolds  
**DAC:** Lt Gen Kenneth Eickmann  
**Contractor:** Cartwright Electronics  
**Contractor PM:** Mr. Dudley Thompson  
**OPR:** 1Lt Jim Reynolds, ASC/WMA,  
DSN 872-9307x5123

### Program Description

Interim system to meet the short term vector scoring needs for the AMRAAM JSPO employing the Vector Doppler Scorer (VDOPS)--a noncooperative missile-scoring radar that provides end game vector trajectory reconstruction of air-to-air missiles fired at target drones.

### How Streamlining Made a Difference

Utilization of a large number of Acquisition Reform initiatives including extensive government and contractor interface prior to RFP release, a source selection based on critical discriminators of performance only requirements, and an Eyes On, Hands Off (EOHO) streamlined management approach led to the following results:

MEASURE	FROM	TO
Requirement Definition to Production Delivery	24 months	13 months
Source Selection Time	1 month	7 days
Source Selection Team	20 people	8 people
Government Management	4 manyears	1 manyear
Number of CDRL's	15	6
Per Unit Cost	~\$75 K	~\$55 K

**Bottom Line:** Reduced the number of CDRLS and the amount of manpower required to manage effort (doing it **better**); fully integrating Government/contractor IPTs (doing it **faster**); saving substantial overhead costs by attending only one program review (less **oversight**); providing a product that is 30% cheaper and more capable than the Navy's DSQ-50 scoring system from the same contractor (doing it **cheaper**).
